PEPTIDEDOSAGE

# Argireline Dosage Chart

Medically reviewed June 21, 2026 · Page updated November 21, 2026

TYPICAL RESEARCH DOSE

## 5-10% topical serum/cream, applied twice daily

### 10 mg vial + 2 mL bacteriostatic water

| PHASE | DOSE PER INJECTION | UNITS (PER INJECTION) |
|---|---|---|
| Introductory educational reference (~5 units) | 250 mcg | 5 units (0.05 mL) |
| Standard educational reference (~10 units) | 500 mcg | 10 units (0.10 mL) |
| Upper educational reference (~15 units) | 750 mcg | 15 units (0.15 mL) |

STORAGE

Lyophilized powder stored frozen at -20 °C, protected from light and moisture. Reconstituted solution or finished serum refrigerated at 2-8 °C, kept out of direct light, and used within roughly 4 weeks. Acetyl hexapeptide-8 in solution is sensitive to heat and oxidation, so finished cosmetic formulations are typically buffered and stored cool and dark.

Educational reference only, not medical advice. Figures restate the research protocol published at the address above.
